1   Wind self-adhesive felt tape (21) around iPod interface (3) on the side with the connection jack for iPod wiring harness (see arrow) as shown in figure.

2   Attach velcro strip (22) to iPod interface (3) as shown in figure.

[i] Adhesion surfaces must be clean, dry and free of grease.

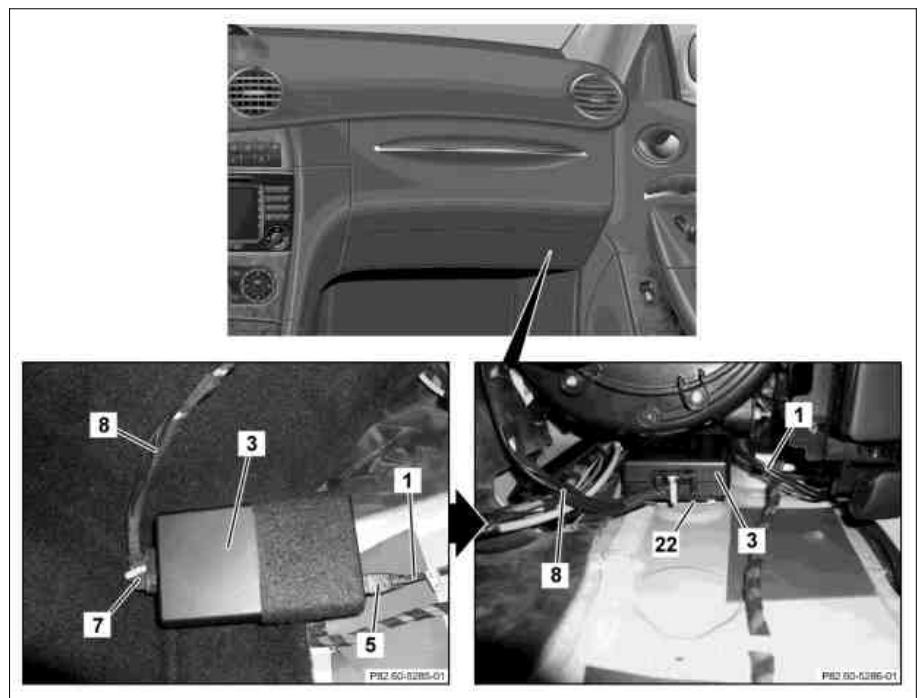

P82.60-5281-11

3   Connect connector (5) of iPod wiring harness (1) and connector (7) of interface wiring harness (8) to the iPod interface (3).

[i] The connections are mechanically coded to prevent connecting incorrectly.

4   Position iPod interface (3) between AC housing and A-pillar and secure to the A-pillar using velcro strip (22) as shown in figure.

[i] Adhesion surfaces must be clean, dry and free of grease. If required, fasten iPod interface (3) additionally using self-adhesive felt tape.

Shown on model 209.3
